Star bot losers, Tuesday 10/6/2026

4 losing trades, total $-24.88. RIGHT ENTRY (your rule): right after the DEEPEST V of the day (from 9:45; a 1%+ drop into a low, then a 1%+ rebound holding it) as soon as the price starts sloping up -- watched or not; if there is none, the first V after the bot's buy. Right sell = the highest close before that V's low breaks. Triangle = the V.
